Forecast for Monday 27 Feb 2023

Weather: After a clear and frosty start, cloud moves in from the northeast through the morning, bringing with it the odd shower through the day. Showers mainly falling as rain especially at low levels, but falling as snow above 600m initially, rising to above 800m during the day. Chance of showers should ease during the late afternoon, possibly picking up again into the night.

Chance of cloud-free hill tops above 600m: 90% overnight. Becoming 40% for northeast of park, rising to 60% by afternoon. 70% for southwest.

Low cloud and visibility: Clear skies initially overnight, before extensive cloud moves in from the northeast through the morning, with bases around 400m. Cloud will lift during the middle part of the day to around 800m, with the odd break possible. Visibility generally very good beneath the cloud and for southwestern peaks, falling to poor or very poor in showers and summit cloud.
